Explanation

The individual issuing deparment, bureau, office, or agency is considered the publisher of Government publications.

Words and figures enclosed in brackets [ ] are given for information, but do not appear on the title pages of the publications cataloged. Place and printer are not given for publications printed at the United States Government Printing Office, Washington, D.C. Size is not given for octavo publications. Size of maps is approximate, measurement being made from outer edge of border, excluding margin. The dates given with Senate and House documents and reports are the dates on which they were ordered to be printed. Usually the printing promptly follows the ordering, but various causes sometimes make delays.

The word "processed" as used in this catalog indicates publications which are reproduced by duplicating processes other than ordinary printing, e.g., mimeograph, multigraph, planograph, rotaprint, multilith. Processed publications are not obtainable from the Superintendent of Documents. Requests for them, if they are available, should be addressed to the issuing office or to the Office of Technical Services, as indicated by the distribution symbol.

Under provisions of the Printing Act of January 12, 1895, all Government publications are entered in the Monthly Catalog. However, administrative and confidential (or restricted) publications are omitted.

The L.C. card number appended to some of the entries is for those libraries ordering printed cards from the Library of Congress. The number at the extreme right of an entry indicates the classification of the publication in the Office of the Superintendent of Documents.

General Information

The Superintendent of Documents, Government Printing Office, Washington, D.C., is authorized by law to sell copies of Government publications and to allow a discount of 25 percent to book dealers and also to quantity purchasers of 100 or more copies of a single publication on condition that they will adhere to the public sales price set by the Superintendent of Documents and that publications shall not be overprinted with any advertising matter.

Publications cannot be supplied free to individuals nor forwarded in advance of payment.

PRICE LIST

There is no general price list of public documents, but numerous lists have been prepared on special subjects and any of these will be furnished free, on application, by subject or subjects concerning which information is desired. It will also be noted that current publications which are for sale are listed in this catalog.

LIST OF SELECTED PUBLICATIONS

In addition to the price lists, the Documents Office issues a biweekly list of Selected United States Government publications for sale by the Superintendent of Documents. Each list is arranged alphabetically by subjects, with annotations and prices, and may be obtained free upon application to the Superintendent of Documents.

CONGRESSIONAL BILLS, DOCUMENTS, AND REPORTS

More than 12,000 different bills are usually introduced during a Congress, and there are additional prints on many during the progress of the legislation. With the exception of a very few—such as revenue bills—the demand is an unknown quantity and on most of them we receive no orders, which makes it impossible to print a sales supply. It may be that a copy could be obtained from your Congressman.

A difficult problem is also presented in providing a supply of congressional documents, hearings, and reports because there are approximately 6,000 of this class of publications issued during a Congress and only a few of them are called for. We will attempt to print for sale a few of the more important ones, but if not priced the only possible source would be from your Congressman.

HOW TO ORDER PUBLICATIONS

Publications entered in this catalog that are for sale by the Superintendent of Documents are indicated by an asterisk (*) preceding the price. Those for sale by the Office of Technical Services, Commerce Department, are indicated by a farad (Φ) preceding the price. A black dot (●) indicates that the publication has been or will be sent to depository libraries. A dagger (†) indicates that application should be made to the department, bureau, or agency issuing the document. A double dagger (‡) indicates that the document is printed for official use and is not obtainable. Whenever additional information concerning the method of procuring a document seems necessary, it will be found under the name of the bureau by which it was published.

In ordering a publication from the Superintendent of Documents, give (if known) the name of the publishing department, bureau, or agency, and the title, together with the classification number which is added to the entry at the extreme right; order the congressional documents and reports by the title, together with the document or report number and the Congress, e.g., H. doc. 108, 82d Congress.

Do not use the L.C. card number in ordering a publication from the Superintendent of Documents.

HOW TO REMIT

Remittances for documents marked with an asterisk (*) should be made to the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C., by coupon, postal money order, express order, or check. Publications cannot be mailed in advance of receipt of remittance. Currency may be sent at sender's risk. Foreign remittances should be made either by international money order or draft on an American bank.

Foreign money, defaced or smooth coins, will not be accepted. Do not send postage stamps.

For the convenience of the general public, coupons in the denomination of 5c that are good until used in exchange for Government publications sold by the Superintendent of Documents, may be purchased from his office. Address order to Superintendent of Documents, Government Printing Office, Washington 25, D.C.

Persons who make frequent purchases from the Superintendent of Documents may find a deposit account convenient. Deposits of $25.00 or more are accepted against which orders may be placed without making individual remittances or first obtaining quotations. Order blanks are furnished for this purpose. After the handling of the order has been completed, it will be returned showing the publications supplied, explanations regarding those not sent, the amount of charge, and the balance on deposit.

No charge is made for postage on documents forwarded to points in United States and possessions, or to Canada, Cuba, Mexico, Newfoundland (including Labrador), and certain Central and South American countries. To other countries the regular rate of postage is charged, and remittances must cover such postage. In computing foreign postage, add one-fourth of the price of the publication.

LIBRARY CLASSIFICATION IN DOCUMENTS OFFICE

The classification given at the right of entries for departmental publications is that used in the Library of the Division of Public Documents. It is also used as a catalog number for sales stock of this office. The shilling mark (/) separates what would ordinarily be superior or inferior numbers or letters, as it is not practicable to print these numbers or letters as superiors or inferiors in the Monthly Catalog.

3745 Military specifications. D 1.12:

NOTE.—These specifications are now so completely covered by the Military Index, volumes 2, 3, and 4, published by the Army, the Navy, and the Air Force, semi-annually and kept current by cumulative supplements, that listing in the Monthly Catalog of United States Government Publications represents unnecessary and wasteful duplication of effort. For that reason they will no longer be listed.

Complete information on the three indexes of specifications will be found in the November 1959 Monthly Catalog under Entry number 17129, in the January 1960 Monthly Catalog under Entry number 160, and in the February 1960 Monthly Catalog under Entry numbers 1460, 2412, and 3169.

3813 Federal specifications. ● Item 563 GS 2.8:

NOTE.—These specifications are now so completely covered by the Index of Federal specifications, standards, and handbooks with cumulative monthly supplements, that listing in the Monthly Catalog of United States Government Publications represents unnecessary and wasteful duplication of effort. For that reason they will no longer be listed.

Complete information on the Index of Federal specifications will be found in the February 1960 issue of the Monthly Catalog under Entry number 2800.

Air frames, *see* Airframes.
Air inlets (aircraft):
circular-internal-contraction with translating centerbodies measured at Mach numbers from 2.1 to 3.0, pressure recovery characteristics 4195
full-scale nacelle, development of flow distortions 4211
rectangular supersonic scoop, yaw and angle of attack effect on pressure recovery and mass-flow characteristics 4219
supersonic—
conical nose, effect of centerbody boundary-layer removal near throat at Mach 1.6–2.0 4208
continuous normal-shock positioning control for translating-spike supersonic inlet in combination with J34 turbojet engine 4212
nacelle-type, preliminary investigation of shield to improve angle-of-attack performance 4214
Air lines, *see* Air carriers.
Air speed:
subsonic and transonic, rolling moment due to side-slip of swept wings 4269

Entry

Air speed—Continued
supersonic—
aerodynamic and hydrodynamic characteristics of deck-inlet multijet water-based-aircraft configuration 4233
Bell X–1A airplane, damping in roll, wind-tunnel investigation 4229
interference effects on damping in roll of Bell X–1A airplane, studies 4232
transonic—
heated propulsive jet effects on drag characteristics of series of related afterbodies 4231
pressure distributions on convoy-fuselage configurations 4234
transonic and supersonic, vertical-tail loads measured in flight on 4 airplane configurations 4271
Air traffic:
activity, Federal airways system, summary, 1959 3781
rules, civil aeronautics manual, supplement 3774
rules, civil air regulations amendments 3779–80
Air trajectories, *see* Trajectories.
Aircarriers, *see* Air carriers.
Aircraft:
aerial refueling operations, right-of-way, civil air regulations amendment 3780
control—
and warning system planning, AF manual 3332
half-delta tip with 60° sweep angle, effect of change in airfoil section on hinge-moment characteristics 4221
jet-spoiler, on 45° sweptback wing at Mach numbers of 1.61 and 2.01, aerodynamic characteristics 4251
speed-brake position of swept-wing fighter effect 4276
spoiler-slot-deflector, on thin untapered wings, effect of aspect ratio and chordwise location on effectiveness, wind-tunnel investigation 4239
surface, on 2-dimensional wing, aerodynamic damping by free-oscillation method 4255
surface, spoiler, and jet, zero-lift rolling effectiveness and drag on 80° delta-wing missile 4268
see also Fighter planes—Flight—Helicopters—Seaplanes — Stability of aircraft—*also* parts, e.g., Nose (aircraft).
Aircraft accidents:
investigation reports 3453
radio collision avoidance, systems 4359
Airfields, *see* Airports—Aviation fields.
Airfoils, sections, effect of change on hinge-moment characteristics of half-delta tip control with 60° sweep angle 4221
Airframes, design and construction specification bulletin 3350
Airmen, classification battery AC–2A, predication of criteria for medical and dental specialties 3360
Airplanes:
Bell X–1A—
damping in roll at supersonic speeds, investigation 4229
interference effects on damping in roll at supersonic speeds, studies 4232

Entry

Airplanes—Continued
Bell X-1A—Continued
research, behavior during exploratory flights at Mach numbers near 2.0 and at extreme altitudes 4216
Douglas D-558-II research, longitudinal and lateral stability characteristics, effects of jet exhausts 4218
interceptor-type, low-lift drag and longitudinal trim characteristics as determined from flight tests of rocket-powered models at Mach numbers between 0.75 and 1.78 4222
jet—
interaction of jet and flat plate located in airstream 4207
vertical-take-off-and-landing, ground proximity effect on aerodynamic characteristics of 2 horizontal-attitude models 4244
supersonic configuration, interceptor-type with overhanging tail boom at Mach numbers from 1.09 to 1.34, free-flight investigation of jet effect on low-lift drag and longitudinal trim 4243
tail-wing fuselage combinations, lateral stability investigation at Mach numbers from 0.8 to 1.7 of 2 rocket-booster models of airplane configuration 4247
tail-wing-fuselage configurations low-speed investigation of static longitudinal and lateral stability characteristics 4273
turbine-powered, requirements for use of oxygen masks by flight crews, civil air regulations amendment 3776–77
wing-body combinations, sweptback, effects of wing incidence on aerodynamic loading characteristics 4220
X-1E model, wind tunnel investigation of static lateral and longitudinal stability characteristics at combined angles of attack and sideslip at supersonic speeds 4246
see also Fighter planes—Seaplanes.
Airports, facilities, present and future (address) 3772
Airways, definition of control areas, civil air regulations amendment 3779
